

# USB MIDI HOST Box(UMH-10)

## Instructions

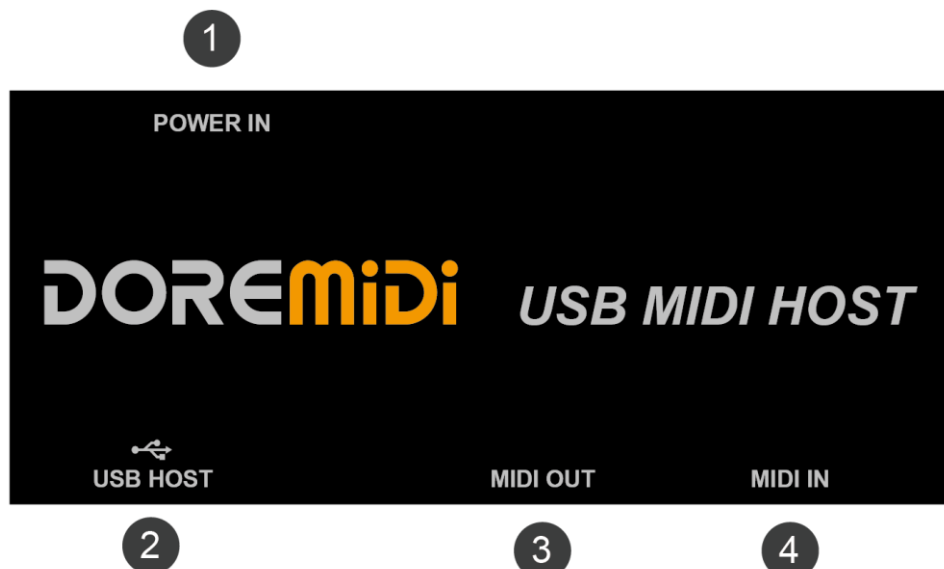

## 1. Product Introduction

USB MIDI HOST box (hereinafter referred to as product), can be used to connect MIDI devices with MIDI five-pin interface and MIDI devices with USB interface, this product has a standard MIDI input interface, MIDI output interface, and full-speed standard USB MIDI HOST Interface, with 16 channels of standard MIDI, can communicate all standard MIDI commands.

## 2. Product Parameters

Name	Description
Model	UMH-10
Size (L x W x H)	115*53*33mm
Weight	150g
USB Interface	Standard full-speed USB MIDI HOST interface
MIDI Interface	High-performance FTP processing with one input and one output 16-channel MIDI interface
Power In Interface	Powered by USB-B interface, 5VDC
Indicator Light	Product power indicator, USB working indicator, MIDI output/output indicator
MIDI Compatibility	Compatible with all devices with MIDI standard interface
USB Compatibility	Compatible with all MIDI devices with USB TO HOST

## 3. Product Interface

- 1** POWER IN: Product power supply interface, use USB-B plug to supply power to the product, supply voltage 5V
  - 2** USB HOST: USB host interface, connect MIDI device with USB TO HOST via USB-A plug
  - 3** MIDI OUT: MIDI output interface, using a standard five-pin MIDI cable, connected to the input interface of the MIDI device
  - 4** MIDI IN: MIDI input interface, using a standard five-pin MIDI cable, connected to the output interface of the MIDI device
- 1 2 3 4** Indicator Light: Work indicator light with corresponding interface

#### 4. Product Connection
